

## Water Content Tester

This instrument is suitable to determine water content in petroleum products, result is % volume. Certain sample mixes with water-free solvent to distillate and measure water content.

**Model: WCT-R1**

### **I. Technical specifications**

1. Applicable standards:GB/T260,ASTM D95
2. Heating method:electric heating jacket
3. Temperature sensor:high accuracy PT100
4. Working units:two units

### **II. Main features**

1. Electric heating jacket is safe without open fire
2. Glass tube meets standard requirements
3. Big power solid regulator controls heating jacket
4. Potentiometer adjusts temperature rising speed
5. The shell is molded by cool-rolled plate
6. Integrated structure is easy to operate
